

Advancing Sustainability in Single-Use Medical Devices

Introducing Spectrum QC **eco**

Our new GlideScope® Spectrum QC eco™ single-use video laryngoscopes have been designed with the environment in mind, while delivering GlideScope's trusted performance.

We are committed to a future where exceptional patient care goes hand-in-hand with care for our environment.

Join us on this journey.

Innovation with the Environment in Mind

Bio-Based Plastic Shell¹

Spectrum QC eco™ is made with an 80% bio-based plastic shell via the mass balance approach, certified by International Sustainability and Carbon Certification (ISCC) PLUS.¹ The bio-based materials have a 74% lower carbon footprint compared to fossil fuel-based alternatives.² This is accomplished without compromising performance.

International Sustainability and Carbon Certification (ISCC) PLUS

Spectrum QC eco is available in an extensive portfolio of single-use video laryngoscopes.

No Ethylene Oxide (EtO) Gas

Packaged clean and ready for patient use without unnecessary sterilization. No sterilization eliminates the risk of harmful EtO gas being released into the environment.³

Hyperangle S1, S2, S2.5, S3, S4

Miller S00, S0, S1, S2

MAC S1, S2, S3, S4

Recycled Shipment Packaging

All Spectrum QC eco shipment boxes are made of recycled cardboard material.

1. The raw material of the shells is linked to 80% bio-circular feedstock, which is allocated via the mass balance approach based on the amount of bio-circular material sourced in its production.
2. The raw material has a 74% lower carbon footprint than a fossil-fuel based plastic, based on Product Carbon Footprint (PCF) sourcing data on file.
3. Spectrum QC eco is non-sterile. It is produced and packaged in an ISO Class 8 cleanroom environment, ready for patient use.
